

One studio. A wider range of support.

From site measurements and drawings to digital communication and prototypes, choose a single service or a connected project scope.

01 Site analysis & reality capture

GIS and site context, field measurements, LiDAR and point clouds for existing-condition records.

02 Architectural design & drafting

Floor plans, additions, renovations, space planning, elevations and design studies.

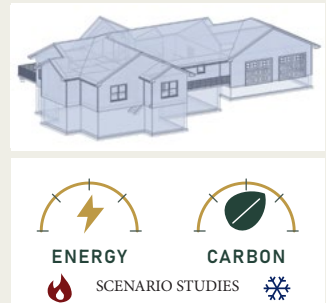

03 CAD, BIM & construction documents

Coordinated models, plans, sections, schedules, quantities, assemblies and details.

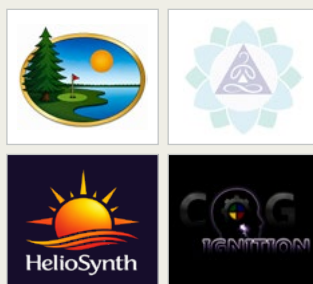

04 Visualization & performance profiles

Renderings, animation, and energy or carbon scenarios informed by available project data.

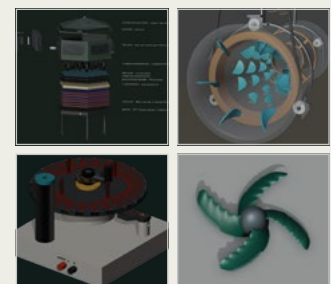

05 Web, identity & publication design

Websites, logos, diagrams, brochures, reports, books and interactive publications.

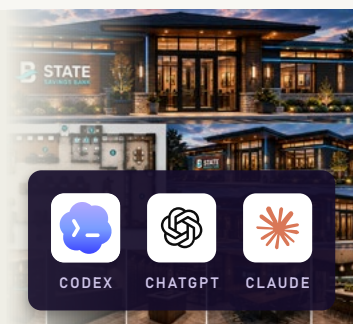

06 Digital fabrication & prototyping

CAD geometry, technical illustration, CNC-oriented data and prototype development.

07 AI-assisted workflow consulting

Tool selection, research synthesis, knowledge organization and task automation.

08 Drone & aerial documentation

Property, site and construction progress imagery connected to field documentation.

LET'S DISCUSS YOUR NEXT PROJECT.
